Could they use an old bird skeleton and a 3-D printer to make Karl a new beak?

We all share the same world, but do we experience it in the same way? This series gives children the opportunity to see the world through other people's eyes. Readers will understand the challenges that others face, and learn about the causes for differences between people. These differences are not always seen as a disability, and people develop their own ways of succeeding despite having an unusual way of experiencing the world around them.
